CAMS ENGINEERING

Clean energy solutions to power inclusive agricultural transformation

Ethiopia

Founded: 2014

https://camsengineeringplc.com

Sector: Productive Use of Renewable Energy

Ethiopia's smallholder farmers face low productivity and high post-harvest losses due to limited access to mechanization and affordable renewable energy solutions. **Diesel-powered** systems dominate the market, driving up costs and emissions.

CAMS Engineering delivers affordable and digitized mechanization and cold-chain services through a network of trained **Agricultural Service Providers (ASPs) and Agro-Link Officers.** The company equips ASPs with **equipment, business skills, and financing**. The digital Bedebo Platform streamlines scheduling, payments, and performance monitoring, while pay-as-you-go and cooperative models make mechanization affordable.

100+ pieces of equipment
deployed in the CAMS network of ASPs.

10,700+ tons of grain threshed
using CAMS mechanization

150+ ASPs hired and trained
primarily women and youth

10,000+ farmers
served across Ethiopia

$780K USD
