WUCHI WAMI

Sustainable beekeeping and honey production that protects forests and creates rural income

Zambia
Founded: 2018
Sector: Agri-food

Wuchi Wami's addresses the interconnected challenges of **environmental degradation, poverty, and gender inequality** in North-Western Zambia. By promoting sustainable agriculture and **eco-friendly honey production**, the company empowers local farmers—particularly women—to adopt practices that conserve forests, generate income, and strengthen community resilience.

By replacing traditional bark hives with **reusable softwood top-bar beehives**, the company promotes environmental preservation and gender-inclusive participation in beekeeping. Farmers sell their honey to Wuchi Wami, ensuring a steady and sustainable source of income..

125 tons of honey produced annually

500+ women trained
in sustainable agriculture practices, entrepreneurship and financial literacy
